CHUNG-HUA SHIPYARD, SHANG-HAI, CHINA

INTRODUCTION

This report is one of a series describing Chinese Communist shipyards and ports as observed on aerial photography.

Chung-hua Shipyard is located on the western bank of the Huang-pu Chiang (River), approximately 12 miles from the confluence of this river with the Chang Chiang (Yangtze River), at 31-16N 121-33E (Figure 1). An alternate name is the Shang-hai Shipyard Chung-hua [REDACTED]

DESCRIPTION

Facilities (Figure 2) at this shipyard consist of 1 offshore wharf, 1 pontoon wharf with a movable center section, 3 end-launch building ways, 3 craneways, 3 marine railways and 3 open storage areas. Handling facilities consist of 4 jib cranes, 2 mobile cranes, 1 floating shearlegs crane, 1 floating crane, 2 motorized crane boats, and a bridge crane.

Major construction between [REDACTED] is the completion of an approach [REDACTED]

to the wharf; the marine railways have been reduced in length; and a new wall constructed near the waterfront in the southern sector of the shipyard.

Shipbuilding activity appears to have decreased within the period and the number of

storage crates and probable temporary shelters in the open storage areas has increased. This may be an indication that some of the fabrication is being produced for assembly in other yards.
